Special steel sleeves at the goal mounting hole locations to secure rear structure to front mounting plate, forming a unitized assembly to minimize shock to the glass. Entire frame including goal-mounting structure fitted with a shock absorbing neoprene material to cushion and protect the glass section.

1/2" thick, fully tempered glass section with uniform load and impact strength. Official white border and target area is permanently fired into front side of glass section so that it cannot wear away.

Goal mount structure provided with two holes (7/16") and two studs (3/8"-16) to secure backboard and goal to a direct mount "goal brace" feature which relieves all stress and shock on the backboard conforming to the latest NCAA Rules (BR-73, D-5). The rim will return to the playing position once the load is removed. The function of the breakaway goal shall meet NCAA specifications, which state: "A movable basket ring shall have rebound characteristics identical to those of a non-moveable ring." Goal shall be set at factory for proper flex and rebound requirements.

Rim shall be fabricated from a 5/8" diameter steel rod formed into an 18" inside diameter ring. Inside of ring shall be positioned 6" from the face of backboard by a heavy-duty mounting plate with mounting holes centered to match 5" x 5" or 5" x 4" backboard mounting holes. Goal will mount on standard glass, fiberglass, aluminum, steel, and wood backboards.

Rim shall be rigidly braced by means of die cut steel braces formed and welded to underside of rim for maximum support. Goal shall be provided with twelve "no tie" net attachment clips, welded to rim for net attachment. Goal shall be painted in an official durable orange powder coat. Goal shall be furnished with zinc plated mounting hardware and high quality white nylon anti-whip net. The top half of the anti-whip net is made of durable fibers

Slip tubes consist of 2-5/8" O.D. outer tubes and 2-1/4" O.D. inner tubes. The 503096/503099 height adjuster frame assembly is jig welded and factory assembled to ensure precise alignment and smooth operation. The 503096/503099 height adjuster is electrically operated via a 110-volt single-phase linear actuator with a 25% duty cycle. Electric linear actuator provides smooth reversible motion for loads up to 600 pounds. Linear actuator motor includes cam style limit switches that will allow 24" of travel. The motor shall be controlled by EZ-Stick Power Wand.

EZ-Stick Power Wand is a switched ridged extension cord designed to connect to a recessed plug that is attached to the backstop and a standard building outlet. EZ Stick Power Wand allows for the use of electric height adjuster without the need to hardware each height adjuster.

Height adjuster includes a self-adhesive height scale that is graduated in 1" increments and labeled at 6" intervals. Height scale applied after installation to insure accuracy. Height adjuster covered by one-year limited warranty.

7. Safety Strap: SIX (6) Required

Safety Strap is to be the DRAPER model no. 503229 Aut-O-Loc 2 safety strap by Draper, Inc., Spiceland, IN.

Aut-O-Loc 2 Safety Strap is designed to engage instantly whenever a cable or other lifting mechanism fails. Aut-O-Loc 2 is actuated by speed or inertia in order to stop a load from falling due to a sudden failure such as a cable breakage, cable clamp failure or any increase in speed due to failure or back drive of a winch. Aut-O-Loc 2 is rated for a 1000 lb (454 Kg) load and incorporates a 2" wide polyester belt with a breaking strength rating of 6000

lbs (2,721 Kg) to withstand a 1750 lb (794 Kg) free falling load without any failure of components or the belt.

The housing and drum are manufactured from high tensile heat treated aluminum alloy that naturally resists corrosion without paint. The drum which houses the mechanism is a singular machined piece to retain its structural integrity in the case of a load capture. The locking mechanism always remains in the ready position regardless of whether belt is retracting or extending. The unit operates at a sound level less than 20db to allow the operator clearly hear the operational sounds of the winch and backstop, so they may stop winch operation if there are abnormal audible warnings to indicate possible mechanical issues.

Aut-O-Loc 2 has a universal mount that can accommodate 3 ½" (89 mm) or 4" tube (102 mm) and can mount to support tubes running parallel and/or perpendicular to the backboard. Unit is self aligning with the use of two integral guide wheels so the force of a fall positions the unit in the ideal plane to prevent damage to unit and the supporting structure. The locking mechanism will fully engage within 3" (76 mm) of belt travel in the event of failure. The locking mechanism utilizes multiple high strength steel pawls that deploy and evenly load the drum and housing when engaged and do not rely on a singular locking mechanism.

Aut-O-Loc 2's retractable nylon strap includes a brightly colored warning strip that indicates when maximum payout of the belt has been reached. The strap also features a brightly colored warning indicator that deploys automatically when engaged. Aut-O-Loc 2 is permanently locked when a load of more than 1000 lbs (454 Kg) of force is captured and will not be functional after it has caught a significant load to prevent possible re-use and failure of critical components that are stressed when the unit engages a load.
